Please replace the paragraph beginning at page 6, line 17, with the  
following:

Another aspect of the present invention is the reproducing device  
further comprising packet editing means of replacing picture data other than the  
picture used for special reproduction with dummy data and outputting the data in  
case of reproducing a special reproduction image, if a front half of an MPEG

transport packet of the MPEG transport packets constituting the special reproduction image, in which a plurality of pieces of picture data is detected by the reproducing means, includes the picture data other than the picture used for special reproduction.

Please replace the paragraph beginning at page 7, line 3, with the following:

Still another aspect of the present invention is the reproducing device further comprising packet editing means of replacing picture data other than the picture for special reproduction with dummy data and outputting the data in case of reproducing a special reproduction image, if a rear half of an MPEG transport packet of the MPEG transport packets constituting the special reproduction image, in which a plurality of pieces of picture data is detected by the reproducing means, includes the picture data other than the picture used for special reproduction.

Still another aspect of the present invention is the reproducing device further comprising packet editing means of replacing picture data other than the picture for special reproduction with dummy data and outputting the data in case of reproducing a special reproduction image, if a rear half of an MPEG transport packet of the MPEG transport packets constituting the special reproduction image, in which a plurality of pieces of picture data is detected by the reproducing means, includes the picture data other than the picture used for special reproduction.

Please replace the paragraph beginning at page 7, line 13, with the following:

Yet another aspect of the present invention is the reproducing device further comprising packet editing means of making a replacement with a transport packet in which dummy data is added to the front end of the picture data used for special reproduction and a header of the transport packet is added to a front end of

the dummy data and outputting the transport packet in case of reproducing a special reproduction image, if a rear half of an MPEG transport packet of the MPEG transport packets constituting the special reproduction image, in which a plurality of pieces of picture data is detected by the reproducing means, includes the picture data other than the picture used for special reproduction.

Please replace the paragraph beginning at page 8, line 1, with the following:

Still yet another aspect of the present invention is the reproducing device wherein the dummy data is one of adaptation stuffing or user data of a header of an MPEG transport packet, stuffing or user data of an MPEG packetized elementary stream, and zero-stuffing of an MPEG elementary stream.

Please replace the paragraph beginning at page 8, line 7, with the following:

A further aspect of the present invention is a medium comprising a program and/or data for allowing a computer to carry out all or some functions of all or some means of the reproducing device the medium being processible by a computer.

Please replace the paragraph beginning at page 8, line 12, with the following:

A still further aspect of the present invention is an information aggregate comprising a program and/or data for allowing a computer to carry out all or some functions of all or some means of the reproducing device.

Please replace the paragraph beginning at page 8, line 17, with the following:

A yet further aspect of the present invention is a transmitting medium for transmitting an MPEG transport stream reproduced in the reproducing device.

Please replace the paragraph beginning at page 8, line 21, with the following:

A still yet further aspect of the present invention is a recording medium for recording an MPEG transport stream reproduced in the reproducing device.

CLAIMS:

Please replace claim 5 with the following amended claim:

- 1                   5.     (Once Amended) The reproducing device according to claim  
2 2, wherein the dummy data is one of adaptation stuffing or user data of a header of  
3 an MPEG transport packet, stuffing or user data of an MPEG packetized  
4 elementary stream, and zero-stuffing of an MPEG elementary stream.

Please replace claim 6 with the following amended claim:

- 1                   6.     (Once Amended) A medium comprising a program and/or  
2 data for allowing a computer to carry out all or some functions of all or some  
3 means of the reproducing device according to any one of claims 1, 2 or 5, the  
4 medium being processible by a computer.

Please replace claim 7 with the following amended claim:

- 1                   7.     (Once Amended) An information aggregate comprising a  
2 program and/or data for allowing a computer to carry out all or some functions of  
3 all or some means of the reproducing device according to any one of claims 1, 2 or  
4 5.

Please replace claim 8 with the following amended claim:

- 1                   8.     (Once Amended) A transmitting medium for transmitting an  
2 MPEG transport stream reproduced in the reproducing device according to any  
3 one of claims 1, 2 or 5.

Please replace claim 9 with the following amended claim:

- 1                   9.     (Once Amended) A recording medium for recording an  
2 MPEG transport stream reproduced in the reproducing device according to any  
3 one of claims 1, 2 or 5.
